It created a way for interaction between company and customers with a balanced approach. With its blockchain running and several business partners, the company provides profitable solutions in the cryptocurrency market.

- This prospectus was prepared following compliance with all the rules relating to the cryptoassets market and investments in companies abroad.
- As it is a practical summary, any and all information contained in this prospectus must be verified in the contract for the provision of service for the contracted product, with the service provider being responsible only for what is contractually signed.
- Each and every investment carries a risk to the investor, the track record of the professionals and the company serves to guarantee better performance, but not profit.
- All insurance s are against theft and fraud; insurance does not insure your starting capital against errors in market trading. It is very important that you check past results and operating history of any company that you want to make your investment.
- In order to settle your Income Tax, the acquisition of your crypto-actives through regulated Exchanges and/or Individuals with Transaction Receipt is recommended.
- Each and every digital asset acquired must be informed, free of charge, in your Annual Income Tax return and the tax rate will only be calculated upon capital gain and is levied on profit.

The company

Symatri is a company founded in 2017, with the objective of bringing opportunities to companies and individuals through its own blockchain technology and the cryptoassets market.

Custodian

Bitgo is the largest and most secure cryptoassets bank, for the custody of cryptoassets provide standards such as CryptoCurrency Security Standard (CCSS) and SOC2, while working with the most trusted brands in the industry and offering customers the most secure and comprehensive available insurance on the market today. In its platform, there is the interactivity of Custody, with the possibility of trading to the market without the need for operators to have possession of their protected assets.

Processing and market orders

Nui International is a team with artificial intelligence and qualified professionals to define the best currency for trading and profitability within the cryptoassets market.

Insurance company

Coincover was created by experts who developed their expertise in government, military and police environments. Therefore, by adopting this standard, you automatically access:

- A-** Experience in creating and securely storing private keys;
- B-** Government standard security protocols under access control;
- C-** Cryptographic key materials stored offline in Federal Standard Class A vaults (FED STD) 832;
- D-** Optional recovery time lockout controls for additional protection from collusion;
- E-** Business continuity and disaster recovery protection for your cryptographic assets.

Reinsurer

Lloyd's of London's exclusive insurance market has an unrivaled concentration of specialist underwriting experience and, each day, more than 50 leading insurers, more than 200 registered Lloyd's brokers and a global network of over 4,000 local coverholders operate and bring business to Lloyd's market. The business developed at Lloyd's is taken to specialized syndicates, which assess and underwrite the risk, through brokers and coverholders. Much of the capital available at Lloyd's is provided on a subscription basis - where Lloyd's underwriters join together as syndicates and where syndicates join to underwrite risks and programs. This kind of collaboration, combined with the market's choice, flexibility and financial security, makes Lloyd's the world's leading insurance platform.

Treasury and payments

Keeping a safe way of moving your capital, all trading results, which generate profits, are processed at your request and sent to your broker through Kala Wallet.

Investment objective

Investing in cryptoassets is possible for investors of any social class, whether or not they have experience in the cryptoassets market. Bring more than 1 million families an opportunity to increase their monthly income by at least \$500.00 (five hundred dollars).

- I- The company acts according to the profile chosen by you (conservative, moderate, aggressive);
- II- For greater security, the company analyses, acquires and sells the chosen cryptoassets and does not end the day with cryptoassets of volatile value;
- III- Any and all results are paired with the dollar, in order to take advantage of the gains of a volatile market, minimizing risks, keeping in a currency with a stable value;
- IV- It is up to the company to determine, according to the daily risks, the performance and percentage of its investment to be worked on to optimize results while maintaining safety.
- V- The company protects itself from operating in the cryptoassets market by choosing the most liquid currencies and market stability.

Investment policy

The company is committed to maintaining your capital in a stable digital currency equivalent to the US Dollar.

Risk factors

Before making an investment decision, investors should carefully consider, in light of their own financial situation and investment objectives, all information available in this prospectus and, in particular, evaluate the risk factors described below.

Market risk

Market Risk can be generically defined as the potential losses associated with fluctuations in the prices and rates of cryptoassets. For each type of cryptocurrency, different factors are considered simultaneously in the risk composition. Some of these factors are market news, blockchain usage, forecasts of changes in the evaluated cryptoassets technology, State and National laws, among others.

Liquidity risk

It consists of the risk arising from atypical market conditions, large volume of redemption requests and/or other factors that cause the lack of liquidity in the markets in which the assets comprising the Portfolio are traded.

Risk arising from portfolio concentration

The company can be exposed to significant concentrations of values (billions of dollars) which can affect the final earnings performance and decrease a percentage of the profit.

Risk management

The risk is calculated on a daily basis, using a simulation methodology that allows capturing all the correlations between the various assets in question. The daily analysis determines the exposure of each cryptoassets individually, through the simulation of all the variables involved in its pricing.

Movement rules

To apply, the investor must register on the management site mentioned above in Disclosure and Information Policy, always using the link of an Autonomous Consultant Affiliated to the company, in order to have all the necessary assistance and the correct application of your registration with sending of the Bitcoin cryptoassets.

- I- The company reserves to receive the Bitcoin cryptoassets, making access possible to all countries that allow the purchase of cryptoassets;
- II - Check out the Income Tax policy of your country, the best purchase option is through an exchange accredited in your country and/or purchase from an Individual with a receipt containing all the personal data of both parties.
- III- All company payments are made exclusively in Bitcoin, with stable currency conversion at the time of sending to the wallet chosen by the customer.
- IV- Due to the great fluctuation of the market, the values may arrive with greater, equal, or lesser value in relation to the dollar, depending on the time it takes to confirm the entire transaction;
- V- If the customer does not want the risk of post-receipt transactions, the company recommends that they settle the cryptoassets assets through the Exchange chosen by him and transform them into the country's Fiat currency.

Affiliate service

Each and every affiliate has a Support button on the Menu within the access site. In addition, it is the responsibility of the Independent Affiliate Consultant to provide the necessary support to minimize service time and avoid failures during the process required by the Affiliate Customer.

General provisions

- Graph with income history in 12 months.
- Consult the Administration fees with your Independent Affiliate Consultant.
- For the example in the graph, the Affiliate Client's net profit was approximately 40%. No guarantee that the same result will be repeated, and may even be superior.
